REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: The prior art of record fails to teach and/or suggest the method of fabricating solid-state energy-storage devices in which there is simultaneous deposition of a first film and energized ions of a second material different from the first film material wherein the energized ions are directed towards the first film material to supply energy thereto, in order to assist growth of crystalline structure of the first film layer during the deposition of the first film layer. The prior art of record also fails to teach and/or suggest a method of fabricating a solid-state energy-storage device in which a seed film is formed on a substrate and a first film material and a second material different from the first film material is formed on the seed film, wherein the second material controls growth of crystalline structure of the first film material on the seed film. The method of fabricating a solid-state energy-storage device with deposition of a first film and supplying energized particles of a second material different from the first material to the substrate on which they are applied to control growth of crystalline structure of the first material film on the substrate, wherein after the entire structure is assembled, the device is cryogenically annealed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
